Test plan

Test plan designed for the OrangeHRM website.

The URL to the site:
https://opensource-demo.orangehrmlive.com/web/index.php/auth/login

1.1 My Info Module_ EES View:

Scope:

1. User ability to see the personal details screen when logging into the system.
2. Verify that the user can't edit the following fields.
   A. Employee ID.
   B. Driver License No.
   C. Date of Birth.

Out of the scope:

1. Ability to upload pictures.
2. Contact information.
3. The web is compatible with Google Chrome.
4. Web performance.

Exit criteria:
The test is over if:

1. No bugs are found.
2. No new bugs are generated.
3. The targets are satisfied.

Test approach:
All tests will be done using the manual testing method.

1. User ability to see the personal details screen when logging into the system.
2. Verify that the user can't edit the specific fields.

Timelines:

Test name	Period
TS1.1_PDS (Personal details screen test).	13-11-2024- 17-11-2024
TS1.1_UEA (User editing ability).	13-11-2024- 17-11-2024

Test responsibilities:

1. Developers:

Design codes to satisfy the needs of the business team and the stack holder.
Fix and handle bugs.

2. QA testers:
    1. Ensure the produced applications are designed based on business team requirements.
    2. Ensure the highest number of bugs are detected.
    3. Verifies and validates the produced products.

Environment:
Windows 11.

Apply on:
Google Chrome.
Mozilla Firefox.
Microsoft Edge.
Opera.

Note:
Expect daily reports and test results by the end of each timeline.

Note:
Progress is updated on Trello by Day and meetings are done using the Google Teams platform.

1.2 Photograph:

Scope:

1. The ability of the user to add a photograph of him/herself.
2. Verify the size of the picture that the web can accept.
3. Verify the type of the image the web will accept.

Out of the scope:

1. User ability to see the personal details screen when logging into the system.
2. Contact information.
3. The web is compatible with Google Chrome.
4. Web performance.

Exit criteria:
The test is over if:

1. No bugs are found.
2. No new bugs are generated.
3. The targets are satisfied.

Test approach:
All tests will be done using the manual testing method.

1. The ability of the user to add a photograph of him/herself.
2. Verify the size of the picture that the web can accept.
3. Verify the type of the image the web will accept.

Timelines:

Test name	Period
TS1.2_AP (add photograph).	13-11-2024- 17-11-2024
TS1.2_SP (size of the picture).	13-11-2024- 15-11-2024
TS1.2_TOI (type of the image).	13-11-2024- 15-11-2024

Test responsibilities:

1. Developers:

Design codes to satisfy the needs of the business team and the stack holder.
Fix and handle bugs.

2. QA testers:
    1. Ensure the produced applications are designed based on business team requirements.
    2. Ensure the highest number of bugs are detected.
    3. Verifies and validates the produced products.

Environment:
Windows 11.

Apply on:
Google Chrome.
Mozilla Firefox.
Microsoft Edge.
Opera.

Note:
Expect daily reports and test results by the end of each timeline.

Note:
Progress is updated on Trello by Day and meetings are done using the Google Teams platform.

Scope:

1. To verify the contact information is entered from contact details.
2. To verify the ability of the user to edit the following data:
   - Country.
   - Street 1.
   - Street 2.
   - City/Town.
   - State/Province.
   - ZIP Code.
   - Home.
   - Telephone.
   - Mobile.
   - Work Telephone.
   - Work Email.
   - Other Email.

Out of the scope:

1. User ability to see the personal details screen when logging into the system.
2. Contact information.
3. The web is compatible with Google Chrome.
4. Web performance.
5. Verify the size of the picture that the web can accept.

Exit criteria:
The test is over if:

1. No bugs are found.
2. No new bugs are generated.
3. The targets are satisfied.

Test approach:
All tests will be done using the manual testing method.

1. Verify the contact information is entered from contact details.
2. verify the ability of the user to edit the demonstrated data.

Timelines:

Test name	Period
TS1.3_CI (contact information).	13-11-2024- 17-11-2024
TS1.3_UATID (user ability to edit data).	13-11-2024- 15-11-2024

Test responsibilities:

3. Developers:

Design codes to satisfy the needs of the business team and the stack holder.
Fix and handle bugs.

4. QA testers:
    1. Ensure the produced applications are designed based on business team requirements.
    2. Ensure the highest number of bugs are detected.
    3. Verifies and validates the produced products.

Environment:
Windows 11.

Apply on:
Google Chrome.
Mozilla Firefox.
Microsoft Edge.
Opera.

Note:
Expect daily reports and test results by the end of each timeline.

Note:
Progress is updated on Trello by Day and meetings are done using the Google Teams platform.

1.4 Emergency Contact:

Scope:

1. Verify adding the name of the emergency contact.
2. Verify adding the relationship of the emergency contact.
3. Verify adding the home telephone of the emergency contact.
4. Verify adding the mobile number of the emergency contact
5. Verify if the data are presented after the save.
6. Verify adding or multiple entries for emergency contacts.
7. Verify deleting or multiple entries for emergency contacts.
8. Verify the ability to add attachments.
9. Verify the ability to select from a folder.
10. Verify the ability to upload files.

Out of the scope:

1. User ability to see the personal details screen when logging into the system.
2. Contact information.
3. To verify the contact information is entered from contact details.
4. The web is compatible with Google Chrome.
5. Web performance.
6. Verify the size of the picture that the web can accept.

Exit criteria:
The test is over if:

1. No bugs are found.
2. No new bugs are generated.
3. The targets are satisfied.

Test approach:
All tests will be done using the manual testing method.

1. Verify adding the name of the emergency contact.
2. Verify adding the relationship of the emergency contact.
3. Verify adding the home telephone of the emergency contact.
4. Verify adding the mobile number of the emergency contact
5. Verify if the data are presented after the save.
6. Verify adding of multiple entries for emergency contacts.
7. Verify deleting of multiple entries for emergency contacts.
8. Verify deleting entries for emergency contacts.
9. Verify the ability to add attachments.
10. Verify the ability to select from a folder.

11. Verify the ability to upload files.

Timelines:

Test name	Period
TS1.4_AN (adding name to the emergency contact).	13-11-2024- 17-11-2024
TS1.4_AR (adding relationship to the emergency contact).	13-11-2024- 17-11-2024
TS1.4_AT (adding a home telephone number to the emergency contact).	13-11-2024- 17-11-2024
TS1.4_AM (adding a mobile telephone number to the emergency contact).	13-11-2024- 17-11-2024
TS1.4_DPAS (verifying if the data is presented after saving).	13-11-2024- 17-11-2024
TS1.4_AME (adding multiple entries for emergency contacts).	13-11-2024- 17-11-2024
TS1.4_DME (deleting multiple entries for emergency contacts).	13-11-2024- 17-11-2024
TS1.4_DE (deleting entries for emergency contacts).	13-11-2024- 17-11-2024
TS1.4_AAA (ability to add attachments).	13-11-2024- 17-11-2024
TS1.4_ASF (ability to select from folder).	13-11-2024- 17-11-2024
TS1.4_ATUF (ability to upload a file).	13-11-2024- 17-11-2024

Test responsibilities:

1. Developers:

Design codes to satisfy the needs of the business team and the stack holder.
Fix and handle bugs.

2. QA testers:
   1. Ensure the produced applications are designed based on business team requirements.
   2. Ensure the highest number of bugs are detected.
   3. Verifies and validates the produced products.

Environment:
Windows 11.

Apply on:
Google Chrome.
Mozilla Firefox.
Microsoft Edge.
Opera.

Note:
Expect daily reports and test results by the end of each timeline.

Note:
Progress is updated on Trello by Day and meetings are done using the Google Teams platform.

1.5 Dependents

Scope:

1. Verify the ability to add dependent.
2. Verify the ability to enter the name of the dependent.
3. Verify the ability to enter the relationship of the dependent.
4. Verify the ability to enter the date of birth of the dependent.
5. Observe the data stored in the list.
6. Verify adding of multiple entries for dependent.
7. Verify deleting of multiple entries for dependent.
8. Verify deleting of entries for dependent.
9. Verify the ability to add attachments.
10. Verify the ability to select from a folder.
11. Verify the ability to upload files.

Out of the scope:

1. User ability to see the personal details screen when logging into the system.
2. To verify the contact information is entered from contact details.
3. The web is compatible with Google Chrome.
4. Web performance.
5. Verify adding the name of the emergency contact.
6. Verify adding the mobile number of the emergency contact

Exit criteria:
The test is over if:

1. No bugs are found.
2. No new bugs are generated.
3. The targets are satisfied.

Test approach:
All tests will be done using the manual testing method.

1. Verify the ability to add dependent.
2. Verify the ability to enter the name of the dependent.
3. Verify the ability to enter the relationship of the dependent.
4. Verify the ability to enter the date of birth of the dependent.
5. Observe the data stored in the list.
6. Verify adding or multiple entries for dependent.
7. Verify deleting or multiple entries for dependent.
8. Verify the ability to add attachments.
9. Verify the ability to select from a folder.
10. Verify the ability to upload files.

Timelines:

Test name	Period
TS1.5_AD (adding dependent).	13-11-2024- 17-11-2024
TS1.5_AND (adding name to the dependent).	13-11-2024- 17-11-2024
TS1.5_ARD (adding relationship of the dependent).	13-11-2024- 17-11-2024
TS1.5_ADOBD (adding data of birth of the dependent).	13-11-2024- 17-11-2024
TC1.5_DPAS (verifying if the data is presented after saving)	13-11-2024- 17-11-2024
TS1.5_AMED (adding multiple entries for dependent).	13-11-2024- 17-11-2024
TS1.5_DED (deleting entries for dependent).	13-11-2024- 17-11-2024
TS1.5_DMED (deleting multiple entries for dependent).	13-11-2024- 17-11-2024
TS1.5_AAA (ability to add attachments).	13-11-2024- 17-11-2024
TS1.5_ASF (ability to select from folder).	13-11-2024- 17-11-2024
TS1.5_AUF (ability to upload a file).	13-11-2024- 17-11-2024

Test responsibilities:

1. Developers:

Design codes to satisfy the needs of the business team and the stack holder.
Fix and handle bugs.

2. QA testers:
   1. Ensure the produced applications are designed based on business team requirements.
   2. Ensure the highest number of bugs are detected.
   3. Verifies and validates the produced products.

Environment:
Windows 11.

Apply on:
Google Chrome.
Mozilla Firefox.
Microsoft Edge.
Opera.

Note:
Expect daily reports and test results by the end of each timeline.

Note:
Progress is updated on Trello by Day and meetings are done using the Google Teams platform.

1.6 Immigration:

Scope:

1. Verify the ability to add immigration information.
2. Verify the ability to select the document type.
3. Verify the ability to enter the number that indicates the document type.
4. Verify the ability to enter the issued date.
5. Verify the ability to enter the expired date.
6. Verify the ability to enter the eligible status of the visa or the passport.
7. Verify the ability to enter the eligible review date of the visa or the passport.
8. Verify the ability to add comments.
9. Observe the data stored in the list.
10. Verify adding of multiple entries for Immigration documents.
11. Verify deleting of multiple entries for Immigration documents.
12. Verify deleting entries for Immigration.
13. Verify the ability to add attachments.
14. Verify the ability to select from a folder.
15. Verify the ability to upload files.

Out of the scope:

1. User ability to see the personal details screen when logging into the system.
2. To verify the contact information is entered from contact details.
3. The web is compatible with Google Chrome.
4. Verify the ability to enter the relationship of the dependent.
5. Verify adding the name of the emergency contact.
6. Verify adding the mobile number of the emergency contact

Exit criteria:
The test is over if:

1. No bugs are found.
2. No new bugs are generated.
3. The targets are satisfied.

Test approach:
All tests will be done using the manual testing method.

1. Verify the ability to add immigration information.
2. Verify the ability to select the document type.
3. Verify the ability to enter the number that indicates the document type.
4. Verify the ability to enter the issued date.
5. Verify the ability to enter the expired date.
6. Verify the ability to enter the eligible status of the visa or the passport.

7. Verify the ability to enter the eligible review date of the visa or the passport.
8. Verify the ability to add comments.
9. Observe the data stored in the list.
10. Verify adding multiple entries for Immigration documents.
11. Verify deleting of multiple entries for Immigration documents.
12. Verify deleting entries for Immigration documents.
13. Verify the ability to add attachments.
14. Verify the ability to select from a folder.
15. Verify the ability to upload files.

Timelines:

Test name	Period
TS1.6_AII (adding immigration information).	13-11-2024- 17-11-2024
TS1.6_SDT (select document type).	13-11-2024- 17-11-2024
TS1.6_SIN (select indicator number).	13-11-2024- 17-11-2024
TS1.6_AID (adding issued date).	13-11-2024- 17-11-2024
TC1.6_AED (adding expired date).	13-11-2024- 17-11-2024
TS1.6_AES (adding eligible status).	13-11-2024- 17-11-2024
TS1.6_AER (adding eligible review).	13-11-2024- 17-11-2024
TS1.6_AAC (ability to add comments).	13-11-2024- 17-11-2024
TS1.6_ATOSD (ability to observe stored data).	13-11-2024- 17-11-2024
TS1.6_ATAMEI (ability to add multiple entries).	13-11-2024- 17-11-2024
TS1.6_ADNEI (ability to delete multiple entries).	13-11-2024- 17-11-2024
TS1.6_ADEI (ability to delete entries).	13-11-2024- 17-11-2024
TS1.6_ATAA (ability to add attachments).	13-11-2024- 17-11-2024
TS1.6_ATSFF (ability to select from file).	13-11-2024- 17-11-2024
TS1.6_AUF (ability to upload a file).	13-11-2024- 17-11-2024

Test responsibilities:

1. Developers:

Design codes to satisfy the needs of the business team and the stack holder.
Fix and handle bugs.

2. QA testers:
   1. Ensure the produced applications are designed based on business team requirements.
   2. Ensure the highest number of bugs are detected.
   3. Verifies and validates the produced products.

Environment:
Windows 11.

Apply on:
Google Chrome.
Mozilla Firefox.
Microsoft Edge.
Opera.

Note:
Expect daily reports and test results by the end of each timeline.

Note:
Progress is updated on Trello by Day and meetings are done using the Google Teams platform.

1.7 Job:

Scope:

1. Verify that the ESS user can only view his/her job details.
2. Verify that the ESS user is restricted from the following:
   - Job Title.
   - Job Specification.
   - Employment Status.
   - Job Category.
   - Joined Date.
   - Sub Unit.
   - Location.
   - Employment Contract Start Date.
   - Employment Contract End Date.
   - Attachments.

Out of the scope:

1. Verify the ability to enter the number that indicates the document type.
2. Verify the ability to enter the issued date.
3. Verify the ability to enter the expired date.
4. Verify the ability to enter the eligible status of the visa or the passport.
5. Verify the ability to enter the relationship of the dependent.
6. Verify adding the name of the emergency contact.
7. Verify adding the mobile number of the emergency contact

Exit criteria:

The test is over if:

1. No bugs are found.
2. No new bugs are generated.
3. The targets are satisfied.

Test approach:

All tests will be done using the manual testing method.

1. Verify that the ESS user can only view his/her job details.
2. Verify that the ESS user is restricted from the following:
   - Job Title.
   - Job Specification.
   - Employment Status.
   - Job Category.
   - Joined Date.

- ➢ Sub Unit.
- ➢ Location.
- ➢ Employment Contract Start Date.
- ➢ Employment Contract End Date.
- ➢ Attachments.

Timelines:

Test name	Period
TS1.7_ATVA (ability to view accounts).	13-11-2024- 17-11-2024
TS1.7_VUR (verifying user restrictions).	13-11-2024- 17-11-2024

Test responsibilities:

1. Developers:

Design codes to satisfy the needs of the business team and the stack holder.
Fix and handle bugs.

2. QA testers:
   1. Ensure the produced applications are designed based on business team requirements.
   2. Ensure the highest number of bugs are detected.
   3. Verifies and validates the produced products.

Environment:
Windows 11.

Apply on:
Google Chrome.
Mozilla Firefox.
Microsoft Edge.
Opera.

Note:
Expect daily reports and test results by the end of each timeline.

Note:
Progress is updated on Trello by Day and meetings are done using the Google Teams platform.

1.8 Salary:

Scope:

1. Verifies that the salary information filed is completely hidden from the ESS-user.
2. Verify that the ESS user is restricted from the following:
   - ➢ Salary Component.
   - ➢ Pay Frequency.
   - ➢ Currency.
   - ➢ Amount.
   - ➢ Comment.
   - ➢ Direct Deposit Details.
   - ➢ Attachments.

Out of the scope:

1. Verify the ability to enter the number that indicates the document type.
2. Verify the ability to enter the issued date.
3. Verify the ability to enter the expired date.
4. Verify the ability to enter the eligible status of the visa or the passport.
5. Verify the ability to enter the relationship of the dependent.
6. Verify adding the name of the emergency contact.
7. Verify adding the mobile number of the emergency contact
8. Verify that the ESS user can only view his/her job details.

Exit criteria:
The test is over if:

4. No bugs are found.
5. No new bugs are generated.
6. The targets are satisfied.

Test approach:
All tests will be done using the manual testing method.

1. Verifies that the salary information filed is completely hidden from the ESS-user.
2. Verify that the ESS user is restricted from the following:
   - ➢ Salary Component.
   - ➢ Pay Frequency.
   - ➢ Currency.
   - ➢ Amount.
   - ➢ Comment.
   - ➢ Direct Deposit Details.
   - ➢ Attachments.

- ➢ Sub Unit.
- ➢ Location.
- ➢ Employment Contract Start Date.
- ➢ Employment Contract End Date.
- ➢ Attachments.

Timelines:

Test name	Period
TS1.8_ATVS (ability to view salary is locked).	13-11-2024- 17-11-2024
TS1.8_VUR (verifying user restrictions).	13-11-2024- 17-11-2024

Test responsibilities:

1. Developers:

Design codes to satisfy the needs of the business team and the stack holder.
Fix and handle bugs.

2. QA testers:
   1. Ensure the produced applications are designed based on business team requirements.
   2. Ensure the highest number of bugs are detected.
   3. Verifies and validates the produced products.

Environment:
Windows 11.

Apply on:
Google Chrome.
Mozilla Firefox.
Microsoft Edge.
Opera.

Note:
Expect daily reports and test results by the end of each timeline.

Note:
Progress is updated on Trello by Day and meetings are done using the Google Teams platform.

1.9 Report to:

Scope:

1. Verifies that the ESS user can view the list of supervisors that he/she will report to
2. Verify that the ESS user is restricted from the following:
   - ➢ Assigned Supervisors.
   - ➢ Assigned Subordinates.
   - ➢ Attachments.

Out of the scope:

1. Verify the ability to enter the number that indicates the document type.
2. Verify the ability to enter the issued date.
3. Verify the ability to enter the expired date.
4. Verify the ability to enter the eligible status of the visa or the passport.
5. Verify the ability to enter the relationship of the dependent.
6. Verify adding the name of the emergency contact.
7. Verify adding the mobile number of the emergency contact
8. Verify that the ESS user can only view his/her job details.

Exit criteria:

The test is over if:

1. No bugs are found.
2. No new bugs are generated.
3. The targets are satisfied.

Test approach:

All tests will be done using the manual testing method.

1. Verifies that the ESS user can view the list of supervisors that he/she will report to
2. Verify that the ESS user is restricted from the following:
   - ➢ Assigned Supervisors.
   - ➢ Assigned Subordinates.
   - ➢ Attachments.

Timelines:

Test name	Period
TS1.9_ATSS (ability to see list of supervisors).	13-11-2024- 17-11-2024
TS1.9_VUR (verifying user restrictions).	13-11-2024- 17-11-2024

Test responsibilities:

1. Developers:

Design codes to satisfy the needs of the business team and the stack holder.
Fix and handle bugs.

2. QA testers:
    1. Ensure the produced applications are designed based on business team requirements.
    2. Ensure the highest number of bugs are detected.
    3. Verifies and validates the produced products.

Environment:
Windows 11.

Apply on:
Google Chrome.
Mozilla Firefox.
Microsoft Edge.
Opera.

Note:
Expect daily reports and test results by the end of each timeline.

Note:
Progress is updated on Trello by Day and meetings are done using the Google Teams platform.

1.10 Qualifications:
Scope:

A. Work Experience:
- ➢ Verify the ability to enter previous work experience.
- ➢ Verify the ability to enter multiple work experiences.
- ➢ Verify the ability to delete work experience entries.
- ➢ Verify the ability to delete a multiple number of work experience entries.
- ➢ Verify the ability to see the data stored in the list.

B. Education:
- ➢ Ability to enter education details.
- ➢ Verify the ability to see the data stored in the list.
- ➢ Verify the ability to enter multiple entries for education.
- ➢ Verify the ability to delete education entries.
- ➢ Verify the ability to delete a multiple number of education entries.

C. Skills:
- ➢ Verify the ability to enter special talents.
- ➢ Verify the ability to see the data stored in the list.
- ➢ Verify the ability to enter multiple entries of skills.
- ➢ Verify the ability to delete skills entries.
- ➢ Verify the ability to delete a multiple number of skills entries.

D. Languages:
- ➢ Verify the ability to enter various languages.
- ➢ Verify the ability to see the data stored in the list.
- ➢ Verify the ability to enter multiple entries of languages.
- ➢ Verify the ability to delete language entries.
- ➢ Verify the ability to delete a multiple number of language entries.

E. License:
- ➢ Verify the ability to enter licenses **you may have**.
- ➢ Verify the ability to see the data stored in the list.
- ➢ Verify the ability to enter multiple entries of licenses.
- ➢ Verify the ability to delete license entries.
- ➢ Verify the ability to delete a multiple number of license entries.

F. Attachments:
- ➢ Verify the ability to add supporting documents.
- ➢ Verify the ability to upload documents with one megabit size.
- ➢ Verify the ability to reject documents with more than one megabit size.
- ➢ Verify the ability to attach more than one document.
- ➢ Verify the ability to browse for files from the relevant path.
- ➢ Verify the ability to delete attachment entries.
- ➢ Verify the ability to delete a multiple number of attachment entries.

Out of the scope:

1. User ability to see the personal details screen when logging into the system.
2. Observe the data stored in the list.
3. Verify adding multiple entries for Immigration documents.
4. Verify deleting of multiple entries for Immigration documents.
5. Verify deleting entries for Immigration.
6. Verify the ability to add attachments.
7. Verify the ability to select from a folder.
8. Verify the ability to upload files.
9. Verify the ability to enter the relationship of the dependent.
10. Verify adding the name of the emergency contact.
11. Verify adding the mobile number of the emergency contact

Exit criteria:
The test is over if:

1. No bugs are found.
2. No new bugs are generated.
3. The targets are satisfied.

Test approach:
All tests will be done using the manual testing method.

A. Work Experience:
   ➢ Verify the ability to enter previous work experience.
   ➢ Verify the ability to enter multiple work experiences.
   ➢ Verify the ability to delete work experience entries.
   ➢ Verify the ability to delete a multiple number of work experience entries.
   ➢ Verify the ability to see the data stored in the list.
B. Education:
   ➢ Ability to enter education details.
   ➢ Verify the ability to see the data stored in the list.
   ➢ Verify the ability to enter multiple entries for education.
   ➢ Verify the ability to delete education entries.
   ➢ Verify the ability to delete a multiple number of education entries.
C. Skills:
   ➢ Verify the ability to enter special talents.
   ➢ Verify the ability to see the data stored in the list.
   ➢ Verify the ability to enter multiple entries of skills.
   ➢ Verify the ability to delete skills entries.
   ➢ Verify the ability to delete a multiple number of skills entries.

D. Languages:
  - ➢ Verify the ability to enter various languages.
  - ➢ Verify the ability to see the data stored in the list.
  - ➢ Verify the ability to enter multiple entries of languages.
  - ➢ Verify the ability to delete language entries.
  - ➢ Verify the ability to delete a multiple number of language entries.

Test responsibilities:

1. Developers:

Design codes to satisfy the needs of the business team and the stack holder.
Fix and handle bugs.

2. QA testers:
   1. Ensure the produced applications are designed based on business team requirements.
   2. Ensure the highest number of bugs are detected.
   3. Verifies and validates the produced products.

Environment:
Windows 11.

Apply on:
Google Chrome.
Mozilla Firefox.
Microsoft Edge.
Opera.

Note:
Expect daily reports and test results by the end of each timeline.

Note:
Progress is updated on Trello by Day and meetings are done using the Google Teams platform.

1.11 Membership:
Scope:

1. Verify the ability to add membership statutes.
2. Verify the ability to enter Membership.
3. Verify the input data are presented in the list.
4. Verify the ability to enter multiple entries.
5. Verify the ability to delete entries.
6. Verify the ability to delete multiple entries.
7. The ability to add attachments.

Out of the scope:

1. Verify the ability to enter the number that indicates the document type.
2. Verify the ability to enter the issued date.
3. Verify the ability to enter the expired date.
4. Verify the ability to enter the eligible status of the visa or the passport.
5. Verify the ability to enter the relationship of the dependent.
6. Verify adding the name of the emergency contact.
7. Verify adding the mobile number of the emergency contact
8. Verify that the ESS user can only view his/her job details.

Exit criteria:
The test is over if:

1. No bugs are found.
2. No new bugs are generated.
3. The targets are satisfied.

Test approach:
All tests will be done using the manual testing method.

1. Verify the ability to add membership statutes.
2. Verify the ability to enter Membership.
3. Verify the input data are presented in the list.
4. Verify the ability to enter multiple entries.
5. Verify the ability to delete entries.

2.3 Job Module:
Scope:

Ability to add job information:

A. Job Titles:
    1. Ability to enter job title.
    2. Ability to enter multiple entries.
    3. Ability to view the entries.
    4. Ability to edit the entries.
    5. Ability to delete the entries.
    6. Ability to delete multiple entries.

B. Pay Grades:
    1. Ability to set the pay grade.
    2. Ability to set the salary to maximum value.
    3. Ability to set the salary to minimum value.
    4. Ability to set the step increase.
    5. Ability to set the currency to be paid.
    6. Ability to define multiple currency.
    7. Ability to edit particular currency.
    8. Ability to delete particular currency.
    9. Ability to delete multiple entries.
    10. Ability to view pay grade details.
    11. Ability to delete pay grade.

C. Employment Status:
    1. Ability to define the status of employment heired or fired.
    2. Ability to add entries.
    3. Ability to edit employee status.
    4. Ability to delete employee status.
    5. Ability to delete multiple employee status.

D. Job Categories:
    1. Ability to create job categories.
    2. Ability to view the list.
    3. Ability to edit the list.
    4. Ability to add multiple entries.
    5. Ability to delete entries.
    6. Ability to delete multiple entries.
E. Work Shifts:
    1. Ability to define work shifts for induvial.

2. Ability to define work shifts for group.
3. Ability to assign worker to specific shift.
4. Ability to view the list.
5. Ability to delete multiple entries.
6. Ability to delete entries.
7. Ability to delete multiple entries.

Out of the scope:

1. Verify the ability to enter the number that indicates the document type.
2. Verify the ability to enter the issued date.
3. Verify the ability to enter the expired date.
4. Verify the ability to enter the eligible status of the visa or the passport.
5. Verify the ability to enter the relationship of the dependent.
6. Verify adding the name of the emergency contact.
7. Verify adding the mobile number of the emergency contact
8. Verify that the ESS user can only view his/her job details.

Exit criteria:
The test is over if:

1. No bugs are found.
2. No new bugs are generated.
3. The targets are satisfied.

2.4 Organization Module:
Scope:

A. General Information.
   - ➤ Verify the ability to add information into the panels.
B. Locations.
   - ➤ Verify the ability to add details of the sites of the company.
   - ➤ Verify the ability to add details of the branches of the company.
   - ➤ Verify the ability to track the number of employees in targeted site.
   - ➤ Verify the ability to see the results.
   - ➤ Verify the ability to add multiple locations.
   - ➤ Verify the ability to delete multiple locations.
   - ➤ Verify the ability to delete location.
   - ➤ Verify the ability to search for location.
   - ➤ Verify rest of the location.
C. Structure.
   - ➤ Verify the ability to add sub units.
   - ➤ Verify the ability to create pyramidal structure.
   - ➤ Verify the ability to delete an entry.
   - ➤ Verify the ability to collapse the sub-units.
   - ➤ Verify the ability to expand the sub-units.

Out of the scope:

1. Verify the ability to enter the number that indicates the document type.
2. Verify the ability to enter the issued date.
3. Verify the ability to enter the expired date.
4. Verify the ability to enter the eligible status of the visa or the passport.
5. Verify the ability to enter the relationship of the dependent.
6. Verify adding the name of the emergency contact.
7. Verify adding the mobile number of the emergency contact
8. Verify that the ESS user can only view his/her job details.

Exit criteria:
The test is over if:

1. No bugs are found.
2. No new bugs are generated.
3. The targets are satisfied.

Test approach:
All tests will be done using the manual testing method.

Test name	Period
TS2.4_ATADOS (ability to add details of the sites).	13-11-2024- 17-11-2024
TS2.4_ATADOB (ability to add details of the branches).	13-11-2024- 17-11-2024
TS2.4_ATTNOE (ability to track the number of employees).	13-11-2024- 17-11-2024
TS2.4_ATS (ability to see the results).	13-11-2024- 17-11-2024
TS2.4_ATAL (ability to add locations).	13-11-2024- 17-11-2024
TS2.4_ATAML (ability to add multiple locations).	13-11-2024- 17-11-2024
TS2.4_ATDML (ability to delete multiple locations).	13-11-2024- 17-11-2024
TS2.4_ATDL (ability to delete locations).	13-11-2024- 17-11-2024
TS2.4_ATSL (ability to search for locations).	13-11-2024- 17-11-2024
TS2.4_ATEL (ability to edit locations).	13-11-2024- 17-11-2024
TS2.4_ARL (ability to reset locations).	13-11-2024- 17-11-2024

C. Structure:

Test name	Period
TS2.4_ATU (ability to add units).	13-11-2024- 17-11-2024
TS2.4_ATSU (ability to add sub units).	13-11-2024- 17-11-2024
TS2.4_ATDE (ability to delete entry).	13-11-2024- 17-11-2024
TS2.4_ATCSU (ability to collapse the sub-units).	13-11-2024- 17-11-2024
TS2.4_ATESU (ability to expand the sub-units).	13-11-2024- 17-11-2024

Test responsibilities:

1. Developers:

Design codes to satisfy the needs of the business team and the stack holder.
Fix and handle bugs.

2. QA testers:
    1. Ensure the produced applications are designed based on business team requirements.
    2. Ensure the highest number of bugs are detected.
    3. Verifies and validates the produced products.

Environment:
Windows 11.

Apply on:
Google Chrome.

Note:
Expect daily reports and test results by the end of each timeline.

Note:
Progress is updated on Trello by Day and meetings are done using the Google Teams platform.

2.5 Qualifications Module:

Scope:

A. Skills.
 ➢ Verify the ability to add various sets of skills.
 ➢ Verify the ability to add list of skills.
 ➢ Verify the ability to see the added skills.
 ➢ Verify the ability to delete list of skills.
 ➢ Verify the ability to edit skills.

B. Education.
 ➢ Verify the ability to define various types of educational qualifications.
 ➢ Verify the ability to add education.
 ➢ Verify the ability to see the results.
 ➢ Verify the ability to add multiple educations.
 ➢ Verify the ability to delete multiple educations.
 ➢ Verify the ability to delete education.
 ➢ Verify the ability to edit education.

C. Licenses.
 ➢ Verify the ability to define various types of licenses.
 ➢ Verify the ability to see the results.
 ➢ Verify the ability to delete multiple licenses.
 ➢ Verify the ability to delete licenses.
 ➢ Verify the ability to edit licenses.

D. Languages.
 ➢ Verify the ability to add languages.
 ➢ Verify the ability to see the results.
 ➢ Verify the ability to add multiple languages.
 ➢ Verify the ability to delete multiple languages.
 ➢ Verify the ability to delete languages.
 ➢ Verify the ability to edit languages.

E. Memberships.
 ➢ Verify the ability to define different membership details of the employees.
 ➢ Verify the ability to add membership.
 ➢ Verify the ability to see the results.
 ➢ Verify the ability to add multiple membership.
 ➢ Verify the ability to delete multiple membership.
 ➢ Verify the ability to delete membership.

Out of the scope:

1. Verify the ability to enter the number that indicates the document type.
2. Verify the ability to enter the issued date.
3. Verify the ability to enter the expired date.
4. Verify the ability to enter the eligible status of the visa or the passport.
5. Verify the ability to enter the relationship of the dependent.
6. Verify adding the name of the emergency contact.
7. Verify adding the mobile number of the emergency contact
8. Verify that the ESS user can only view his/her job details.

Exit criteria:
The test is over if:

1. No bugs are found.
2. No new bugs are generated.
3. The targets are satisfied.

Test approach:
All tests will be done using the manual testing method.

A. Skills.
   ➢ Verify the ability to add various sets of skills.
   ➢ Verify the ability to add list of skills.
   ➢ Verify the ability to see the added skills.
   ➢ Verify the ability to delete list of skills.
   ➢ Verify the ability to edit skills.

B. Education.
   ➢ Verify the ability to define various types of educational qualifications.
   ➢ Verify the ability to add education.
   ➢ Verify the ability to see the results.
   ➢ Verify the ability to add multiple educations.
   ➢ Verify the ability to delete multiple educations.
   ➢ Verify the ability to delete education.
   ➢ Verify the ability to edit education.

C. Licenses.
  ➢ Verify the ability to define various types of licenses.
  ➢ Verify the ability to see the results.
  ➢ Verify the ability to delete multiple licenses.
  ➢ Verify the ability to delete licenses.
  ➢ Verify the ability to edit licenses.

D. Languages.
  ➢ Verify the ability to add languages.
  ➢ Verify the ability to see the results.
  ➢ Verify the ability to add multiple languages.
  ➢ Verify the ability to delete multiple languages.
  ➢ Verify the ability to delete languages.
  ➢ Verify the ability to edit languages.

E. Memberships.
  ➢ Verify the ability to define different membership details of the employees.
  ➢ Verify the ability to add membership.
  ➢ Verify the ability to see the results.
  ➢ Verify the ability to add multiple membership.
  ➢ Verify the ability to delete multiple membership.
  ➢ Verify the ability to delete membership.

Timelines:

A. Skills:

Test name	Period
TS2.5_ATAS (ability to add skill).	13-11-2024- 17-11-2024
TS2.5_ATALOS (ability to add list of skills).	13-11-2024- 17-11-2024
TS2.5_ATSs (ability to see results).	13-11-2024- 17-11-2024
TS2.5_ATDLOS (ability to delete list of skills).	13-11-2024- 17-11-2024
TS2.5_ATDS (ability to delete skill).	13-11-2024- 17-11-2024
TS2.5_ATES (ability to edit skill).	13-11-2024- 17-11-2024

B. Education:

Test name	Period
TS2.5_ATAE (ability to add education).	13-11-2024- 17-11-2024
TS2.5_ATSeducation (ability to see the results).	13-11-2024- 17-11-2024
TS2.5_ATAME (ability to add multiple education).	13-11-2024- 17-11-2024
TS2.5_ATDME (ability to delete multiple education).	13-11-2024- 17-11-2024
TS2.5_ATDE (ability to delete education).	13-11-2024- 17-11-2024
TS2.5_ATEE (ability to edit education).	13-11-2024- 17-11-2024

C. Licenses:

Test name	Period
TS2.5_ATAL (ability to add licenses).	13-11-2024- 17-11-2024
